

## Ideation Phase

### Define the Problem Statements

Date	19 September 2022
Team ID	PNT2022TMID39952
Project Name	Project – A Novel Method for Handwritten Digit Recognition System
Maximum Marks	2 Marks

#### 1) Each statement need a way to

Handwritten Recognition  
needs image acquisition

These system used for  
classification and  
recognition of  
handwriting

#### Say they can

The network was trained  
with a large no .of  
standardized picture

System can  
automatically  
recognized  
handwritten

#### 2) Each statement need a way to

System that can  
automatically recognized  
handwritten digits

Handwritten recognition  
plays an important role  
in data statics

#### Say they can

It provides high speed and  
accuracy

Reduces the number of  
connection weights

### 3) Each statement need a way to

Give atmost accuracy in  
recognition

Simplest form of output

Say they can

Introduce more number of  
datasets

Implements efficient form  
of output
